The Canon of Avicenna, one of the principal texts of Arabic origin to be assimilated into the medical learning of medieval Europe, retained importance in Renaissance and early modern European medicine. After surveying the medieval reception of the book, Nancy Siraisi focuses on the Canon in sixteenth- and early seventeenth-century Italy, and especially on its role in the university teaching of philosophy of medicine and physiological theory. Originally published in 1987. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. *The Book of the City of Ladies* Cambridge University Press

Christine de Pizan (c.1364-1430) was France's first professional woman of letters. Her pioneering *Book of the City of Ladies* begins when, feeling frustrated and miserable after reading a male writer's tirade against women, Christine has a dreamlike vision where three virtues - Reason, Rectitude and Justice - appear to correct this view. They instruct her to build an allegorical city in which womankind can be defended against slander, its walls and towers constructed from examples of female achievement both from her own day and the past: ranging from warriors, inventors and scholars to prophetesses, artists and saints. Christine de Pizan's spirited defence of her sex was unique for its direct confrontation of the misogyny of her day, and offers a telling insight into the position of women in medieval culture. *THE CITY OF LADIES* provides positive images of women, ranging from warriors and inventors, scholars to prophetesses, and artists to saints. The book also offers a fascinating insight into the debates and controversies about the position of women in

medieval culture.

Bodhidharma, its first patriarch, reputedly said that Zen Buddhism represents "a special transmission outside the teaching/Without reliance on words and letters." This saying, along with the often perplexing use of language (and silence) by Zen masters, gave rise to the notion that Zen is a "lived religion," based strictly on non-linguistic practice and lacking a substantial canon of sacred texts. Even those who recognize the importance of Zen texts commonly limit their focus to a few select texts without recognizing the wide variety of Zen literature. This collection of previously unpublished essays argues that Zen actually has a rich and varied literary heritage. Among the most significant textual genres are hagiographic accounts and recorded sayings of individual Zen masters, koan collections and commentaries, and rules for monastic life. During times of political turmoil in China and Japan, these texts were crucial to the survival and success of Zen, and they have for centuries been valued by practitioners as vital expressions of the truth of Zen. This volume offers learned yet accessible studies of some of the most important classical Zen texts, including some that have received little scholarly attention (and many of which are accessible only to specialists). Each essay provides historical, literary, and philosophical commentary on a particular text or genre. Together, they offer a critique of the "de facto canon" that has been created by the limited approach of Western scholarship, and demonstrate that literature is a diverse and essential part of Zen Buddhism.

This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). The challenges presented by feminism to traditional understandings of representation, normative values, power relations and the political are not simply the product of late-20th century thinking. *Feminist Moments*, in examining some of the pivotal texts in the history of feminist thought, demonstrates that these challenges emerge from a long and varied history of feminist writing. The volume brings together texts from literary and analytical works written by women and men, and from inside and outside the Western tradition, including Mary Wortley Montagu, Anna Wheeler and William Thompson, Nazira Zeineddine, Betty Friedan, Andrea Dworkin and Luisa Valenzuela. The volume is unique in offering close readings of key passages from the selected texts, making it ideal for classroom use; its original essays, all authored by specialists, will also be of interest to more advanced scholars. In juxtaposing and analysing a wide range of texts which despite their significance are rarely discussed together, *Feminist Moments* provides a fascinating historical narrative of feminist thought which will be highly valuable to students and scholars of the history of political thought, political philosophy and gender and literary studies.

Through a focused and systematic examination of late medieval scholastic writers - theologians, philosophers and jurists - Joseph Canning explores how ideas about power and legitimate authority were developed over the 'long fourteenth century'. The author provides a new model for understanding late medieval political thought, taking full account of the intensive engagement with political reality characteristic of writers in this period. He argues that they used Aristotelian and Augustinian ideas to develop radically new approaches to power and authority, especially in response to political and religious crises. The book examines the disputes between King Philip IV of France and Pope Boniface VIII and draws upon the writings of Dante Alighieri, Marsilius of Padua, William of Ockham, Bartolus, Baldus and John Wyclif to demonstrate the variety of forms of discourse used in the period. It focuses on the most fundamental problem in the history of political thought - where does legitimate authority lie?

How did a society on the edge of collapse and dominated by wandering bands of armed men give way to a vibrant Buddhist culture, led by yogins and scholars? Ronald M. Davidson explores how the translation and spread of esoteric Buddhist texts dramatically shaped Tibetan society and led to its rise as the center of Buddhist culture throughout Asia, replacing India as the perceived source of religious ideology and tradition. During the Tibetan Renaissance (950-1200 C.E.), monks and yogins translated an enormous number of Indian Buddhist texts. They employed the evolving literature and practices of esoteric Buddhism as the basis to reconstruct Tibetan religious, cultural, and political institutions. Many translators achieved the de facto status of feudal lords and while not always loyal to their Buddhist vows, these figures helped solidify political power in the hands of religious authorities and began a process that led to the Dalai Lama's theocracy. Davidson's vivid portraits of the monks, priests, popular preachers, yogins, and aristocratic clans who changed Tibetan society and culture further enhance his perspectives on the tensions and transformations that characterized medieval Tibet.

It has become widely accepted among musicologists that medieval music is most profitably studied from interdisciplinary perspectives that situate it within broad cultural contexts. The origins of this consensus lie in a decisive reorientation of the field that began approximately four decades ago. For much of the twentieth century, research on medieval music had focused on the discovery and evaluation of musical and theoretical sources. The 1970s and 1980s, by contrast, witnessed calls for broader methodologies and more fully contextual approaches that in turn anticipated the emergence of the so-called 'New Musicology'. The fifteen essays in the present collection explore three interrelated areas of inquiry that proved particularly significant: the liturgy, sources (musical and archival), and musical symbolism. In so doing, these essays not only acknowledge past achievements but also illustrate how this broad, interdisciplinary approach remains a source for scholarly innovation.

*Network and Connections in Legal History* examines networks of lawyers, legislators and litigators, and how they shaped legal development in Britain and the world. It explores how particular networks of lawyers - from Scotland to East Florida and India - shaped the culture of the forums in which they operated, and how personal connections could be crucial in pressuring the legislature to institute reform - as with twentieth century feminist campaigns. It explores the transmission of legal ideas; what happened to those ideas was not predetermined, but when new connections were made, they could assume a new life. In some cases, new thinkers made intellectual connections not previously conceived, in others it was the new purposes to which ideas and practices were applied which made them adapt. This book shows how networks and connections between people and places have shaped the way that legal ideas and practices are transmitted across time and space.
