Science fiction occupies a peculiar place in the academic study of literature. At a time when the canon is being consciously expanded and diversified, and when there is growing scholarly interest in technology and popular culture, works of science fiction are nonetheless marginalized by the academy. So too, many works of science fiction engage recognized canonical texts such as the *Odyssey*, yet traditionalists within the academy have largely shunned the serious study of science fiction. In this book, expert contributors examine the traditional and continuing

tendency to exclude science fiction from the literary canon. In exploring this topic, the book addresses many broader issues, such as the nature of canon formation, the role of journals in legitimizing academic inquiry, and the cultural politics of academic gatekeeping.

Identifying a beautiful image in nature is easy, but capturing it is often challenging. To truly seize the essence of a photograph shot out of the studio and in the world requires an artistic eye and impeccable set of photographic techniques. John and Barbara Gerlach have been teaching photographers how to master the craft of photographing nature and the outdoors through their workshops and best-selling books for more than twenty years. Now, equipped with brand new images to share and skills to teach, this celebrated photo team is sharing their latest lessons in the second edition of Digital Nature Photography. Notable

revisions in this new edition include introducing the concepts of focus stacking and HDR, as well as expanded discussions of multiple exposure, wireless flash, RGB histograms, live view, shutter priority with auto ISO, hand-held shooting techniques, and the author's equipment selections. The inspiring imagery in this book covers a broader range of subjects than before including ghost towns, the night sky, animals, and sports, in addition to the classic nature photographs we expect from this very talented author team. This book is a comprehensive guide to one of the broadest subjects in photography, explained and demystified by two respected masters.

This handbook is one of the first comprehensive research and teaching tools for the developing area of global media ethics. The advent of new media that is global in reach and impact has created the need for a journalism ethics that is global in principles and aims. For many scholars, teachers and journalists, the existing journalism ethics, e.g. existing codes of ethics, is too parochial and national. It fails to provide adequate normative guidance for a media that is digital, global and practiced by professional and citizen. A global media ethics is being constructed to define what responsible public journalism means for a new global media era. Currently, scholars write texts and codes for global media, teach global media ethics, analyse how global issues should be covered, and gather together at conferences, round tables and meetings. However, the field lacks an authoritative handbook that presents the views of leading

thinkers on the most important issues for global media ethics. This handbook is a milestone in the field, and a major contribution to media ethics.

Critics hailed the first edition of *The Literature of Scotland* as one of the most comprehensive and fascinatingly readable accounts of Scottish literature in all three of the country's languages - Gaelic, Scots and English. In this extensively revised and expanded new edition, Roderick Watson traces the lives and works of Scottish writers in a beautiful and rugged country that has been divided by political and religious conflict but united, too, by a democratic and egalitarian ideal of nationhood. *The Literature of Scotland: The Twentieth Century* provides a comprehensive account of the richest ever period in Scottish literary history. From *The House with the Green Shutters* to *Trainspotting* and far beyond, this companion volume to *The Literature of Scotland: The Middle Ages to the Nineteenth Century* gives a critical and historical context to the upsurge of writing in the languages of Scotland. Roderick Watson covers a wide range of modern and contemporary Scottish authors including: MacDiarmid, MacLean, Grassie Gibbon, Gunn, Robert Garioch, Iain Crichton Smith, Alasdair Gray, Edwin Morgan, James Kelman, Irvine Welsh, Alan Warner, A. L. Kennedy, Liz Lochhead, John Burnside, Jackie Kay, Kathleen Jamie and many, many more! Also

featuring an extended list of Further Reading and a helpful chronological timeline, this is an indispensable introduction to the great variety of Scottish writing which has emerged since the start of the twentieth century.

Cultural Politics in Harry Potter: Life, Death and the Politics of Fear is the first book-length analysis of topics, such as death, fear and biopolitics in J.K. Rowling's work from controversial and interdisciplinary perspectives. This collection brings together recent theoretical and applied cultural studies and focuses on three key areas of inquiry: (1) wizarding biopolitics and intersected discourses; (2) anxiety, death, resilience and trauma; and (3) the politics of fear and postmodern transformations. As such, this book: provides a comprehensive overview of national and gender discourses, as well as the transiting bodies in-between, in relation to the Harry Potter books series and related

multimedia franchise; situates the transformative power of death within the fandom, transmedia and film depictions of the Potterverse and critically deconstructs the processes of subjectivation and legitimation of death and fear; examines the strategies and mechanisms through which cultural and political processes are managed, as well as reminding us how fiction and reality intersect at junctions, such as terrorism, homonationalism, materialism, capitalism, posthumanism and technology. Exploring precisely what is cultural about wizarding politics, and what is political about culture, this book is key reading for students of contemporary literature, media and culture, as well as anyone with an interest in the fictional universe and wizarding world of Harry Potter.
